

EP-1260

Friction Welder - Polypropylene

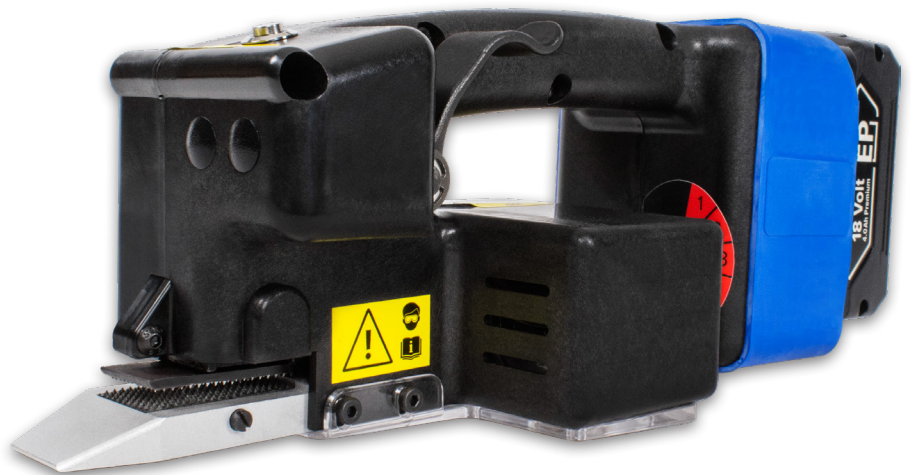

Seals in Seconds!

The Friction Welder is designed to seal polypropylene strapping using heat through friction – ensuring strong and secure pallets. Powered by an 18 Volt, Li-Ion battery, the Friction Welder can accommodate strap widths up to 1¼” and have 5 time settings.

STRAP TYPE	Polypropylene
STRAP WIDTHS	up to ½” to ¾”
STRAP THICKNESS	up to .060
BREAK STRENGTH	≥ 80%, when properly set
TIME SETTINGS	5 settings

Other features:

- Usable with flat package loads (batteries & charger sold separately)
